Manuale di istruzioni
**NOTICE**

All instructions, warranties and other collateral documents are subject to change at the sole discretion of Horizon Hobby, LLC. For up-to-date product literature, visit horizonhobby.com and click on the support tab for this product.

**MEANING OF SPECIAL LANGUAGE**

The following terms are used throughout the product literature to indicate various levels of potential harm when operating this product:

**NOTICE:** Procedures, which if not properly followed, create a possibility of physical property damage AND a little or no possibility of injury.

**CAUTION:** Procedures, which if not properly followed, create the probability of physical property damage AND a possibility of serious injury.

**WARNING:** Procedures, which if not properly followed, create the probability of property damage, collateral damage, and serious injury OR create a high probability of superficial injury.

**WARNING:** Read the ENTIRE instruction manual to become familiar with the features of the product before operating. Failure to operate the product correctly can result in damage to the product, personal property and cause serious injury.

This is a sophisticated hobby product. It must be operated with caution and common sense and requires some basic mechanical ability. Failure to operate this Product in a safe and responsible manner could result in injury or damage to the product or other property. This product is not intended for use by children without direct adult supervision. Do not attempt disassembly, use with incompatible components or augment product in any way without the approval of Horizon Hobby, LLC. This manual contains instructions for safety, operation and maintenance. It is essential to read and follow all the instructions and warnings in the manual, prior to assembly, setup or use, in order to operate correctly and avoid damage or serious injury.

**Age Recommendation:** Not for children under 14. This is not a toy.

**NOTICE:** This product is only intended for use with unmanned, hobby-grade, remote-controlled vehicles and aircraft. Horizon Hobby disclaims all liability outside of the intended purpose and will not provide warranty service related thereto.

**WARRANTY REGISTRATION**

Visit www.spektrumrc.com/registration today to register your product.
SAFETY PRECAUTIONS

- Always ensure all batteries have been properly charged prior to using the model.
- Always check all servos and their connections prior to each run.
- Never operate your model near spectators, parking areas or any other area that could result in injury to people or damage of property.
- Never operate your model during adverse weather conditions. Poor visibility can cause disorientation and loss of control of your model.
- Never point the transmitter antenna directly toward the model. The radiation pattern from the tip of the antenna is inherently low.
- If at any time during the operation of your model you observe any erratic or abnormal operation, immediately stop operation of your model until the cause of the problem has been ascertained and corrected.

CHARGING WARNINGS

⚠️ CAUTION: All instructions and warnings must be followed exactly. Mishandling of Li-Po batteries can result in a fire, personal injury and/or property damage.

- NEVER LEAVE CHARGING BATTERIES UNATTENDED.
- NEVER CHARGE BATTERIES OVERNIGHT.
- By handling, charging or using the included Li-Po battery, you assume all risks associated with lithium batteries.
- If at any time the battery begins to balloon or swell, discontinue use immediately. If charging or discharging, discontinue and disconnect. Continuing to use, charge or discharge a battery that is ballooning or swelling can result in fire.
- Always store the battery at room temperature in a dry area for best results.
- Always transport or temporarily store the battery in a temperature range of 40–120º F (5–49° C). Do not store the battery or model in a car or direct sunlight. If stored in a hot car, the battery can be damaged or even catch fire.
- Always charge batteries away from flammable materials.
- Always inspect the battery before charging.
- Always disconnect the battery after charging, and let the charger cool between charges.
- Always constantly monitor the temperature of the battery pack while charging.
- ONLY USE A CHARGER SPECIFICALLY DESIGNED TO CHARGE LI-PO BATTERIES. Failure to charge the battery with a compatible charger may cause a fire resulting in personal injury and/or property damage.
- Never discharge Li-Po cells to below 3V under load.
- Never cover warning labels with hook and loop strips.
- Never charge batteries outside recommended levels.
- Never charge damaged batteries.
- Never attempt to dismantle or alter the charger.
- Never allow minors to charge battery packs.
- Never charge batteries in extremely hot or cold places (recommended between 40–120º F (5–49º C)) or place in direct sunlight.

The DX6R radio system is supplied with the following:

- 4000mAh Li-Ion Transmitter Pack (Installed in transmitter)
- Charging Base
- SR2000 Race Receiver
- SR6000T Telemetry Receiver
- Bind Plug
- Grip Set
- Spacer set
- Steering Wheel set
- Power Supply
- Sticker set

Support Videos:
For helpful videos on programming the Spektrum™ DX6R and other Spektrum Transmitters go to https://www.spektrumrc.com/

The DX6R features a Micro SD card reader (card not included) and a Micro USB port, enabling you to update the transmitter when firmware and Raceware updates are available. Register your transmitter at www.SpektrumRC.com to receive update notifications.
The DX6R has a charging base designed to charge the transmitters 4000mAh Li-Ion Transmitter Pack at a charge rate of 400mAh. The first time you charge the transmitter, the charge time may be 15-20 hours. Always charge the transmitter on a heat-resistant surface.

**Charging:**

1. Either power off your transmitter or make sure the transmitter is not transmitting (NO orange LED).
2. Connect the AC power cable to the charging base and connect the power supply to a power outlet using the appropriate adapter.
3. Carefully set the transmitter down onto the charging base.
4. The LED will blink blue to indicate the battery is charging. The LED will turn off when the unit goes to sleep.
5. Disconnect the transmitter from the charging base once charging is complete and disconnect the power supply from the power outlet.

**CAUTION:** Never leave a charging battery unattended.

**CAUTION:** Never change the low voltage limit for Li-Ion batteries below 3.3V. Doing so could over-discharge the battery and damage both battery and transmitter.

The DX6R can be charged through the Micro USB port as well.

The DX6R is built on top of the Android operating system and features a large color touch screen display. To navigate around the DX6R use your finger to tap, swipe and drag icons and menus found on the display.

**Home Screen**

1. **APP DRAWER:** Contains applications loaded onto the DX6R.
2. **BACK:** Return to previous screen.
3. **HOME:** Return to the home screen
4. **OVERVIEW:** Allows switching between any of the running applications.

**TIP**

The DX6R application will hide the home screen navigation icons. Access the Navigation icons at anytime by swiping up from the bottom of the screen.
Notification Screen
Swipe down from the top of the screen in any application for quick access to the Notification Screen. From the Notification screen you can quickly edit these settings:

1. Settings
2. User info
3. Screen brightness
4. Wi-fi
5. Bluetooth
6. Notifications

For more information on using the Android OS, tap on the Quick Start Guide icon below.
RF Transmission:
Closing the RaceWare application or opening a different application and not re-opening the RaceWare application will turn off RF transmission at the pre-determined time limit (default is 5 minutes).

**Always keep the RaceWare application open and visible on the screen while driving to avoid losing RF transmission.**

To avoid this issue while using Applications other than Raceware on the DX6R, the Sleep Mode time can be manually set from 15 seconds to NEVER in the System Settings. Go to **Settings>Display>Sleep** to make the changes. Alternately if WiFi is turned on in System Settings, even if it is not connected to a network, the RF transmission will not turn off.

**IMPORTANT:** If Sleep time is changed to NEVER, make sure to turn the radio off at the end of a race day to avoid running down the battery.
1. Turn on the DX6R by pushing and holding the power button for several seconds. The DX6R will begin to boot up.

2. Once the DX6R boots up, locate the RaceWare™ Application on the home screen. Tap on the icon to launch RaceWare.

3. The first time the RaceWare Application is opened, Model Setup will run.

4. Once the Model Setup opens enter the name for the radio and follow the steps to create your first model. See the Model Setup section for more information.

To navigate around the DX6R use your finger to tap, swipe and drag icons and menus found on the display.

Tip

Instantly jump from one of 4 assigned screens by pressing on the scroll wheel. See the APP SETTINGS section for setup.
The Model Setup will open at first start up to aid in creating a new model. Alternately, Model Setup can be accessed at any time by going to the setup page in the RaceWare app.

To use Model Setup, simply select the options you wish to use on your model. Depending on options selected, the available options will change. Once a selection is made press NEXT to move to the following page or PREVIOUS to go back a page.

- **USER NAME**
  Tap in the name field to access the keypad. Enter a user name using up to 20 characters. After initial setup, the name can be changed in the App Settings screen.

- **MODEL NAME**
  Tap in the name field to access the keypad. Enter a model name using up to 20 characters.

- **RECEIVER TYPE**
  Select from a list of compatible Spektrum DSMR® Receivers.

- **AVC® TECHNOLOGY**
  Activates or deactivates AVC technology in this model. This menu is only available if an AVC receiver was selected in RECEIVER TYPE.

- **POWER SYSTEM**
  Select either electric or gas/nitro engines.

- **REVERSE**
  Select either REVERSE CAPABLE or NO REVERSE. This menu is only available if an electric power system is chosen.
• **THROTTLE & BRAKE**
  Select either a single channel or independent channels for the throttle and brake.

• **MOTORS**
  Select either a single motor or front and rear motors (MOA).

• **STEERING**
  Select either a single servo or dual servo setup. Depending on options selected, front and rear steering will be available.

• **AUXILIARY CHANNELS**
  Select the open AUX channel being assigned to the second motor or servo. If there are open AUX channels, select the AUX channel and create a name for the function being used (e.g. Winch).

• **RX OUTPUT MAP**
  Once all options are made, the RX Output Map will outline the current receiver connections. Double check that all options have an assigned channel.

• **BINDING**
  When the model is complete the last option is to bind your model to the transmitter.
  See BINDING section for more information.

The operations chart on the next page shows the setup options of a 4 channel AVC receiver. Receivers with less channels will have less options.
The RaceWare application features 3 - 4 main screens depending on the receiver being used. Simply swipe left or right to move to a different screen.

- **Dashboard** - The Dashboard is the Home screen for the DX6R. Timers, trims and rates are all visible at a glance. The Dashboard is the first of 4 main screens available to the DX6R user.

- **TELEMETRY** - Telemetry can be found by swiping right from the Dashboard screen. Telemetry displays all telemetry information including signal strength, Temperature, RPM and Rx Voltage.

**IMPORTANT:** **TELEMETRY** is only available if you are using a telemetry capable receiver.

- **MONITOR** - Monitor can be found by swiping right from the Dashboard or Telemetry screens if available. The Monitor displays the position of the Steering Wheel, Throttle/Brake, Trims and the position of any AUX channels.

- **SETUP** - Setup can be found by swiping right from the Monitor screen. Setup is where the majority of model setup takes place. The Setup screen also has short cuts for **MODEL SETUP** and **APP SETTINGS**.

- **Tip**
  - Take note of the circles at the bottom of the screen. The solid circle represents the current screen location.
  - Some screens display more information than can fit in the window. Use your finger to drag the screen up or down to view all the content.
The Model screen is accessed by tapping the model image in the top right corner of every main screen.

**USE THE MODELS SCREEN TO:**
- Create New Models
- Import Models
- Activate Models in List
- Sort Model List

**CREATE NEW MODEL**-
- Tap on Create New Model
- MODEL SETUP will open, Follow the prompts to setup a new model.
- After setup is complete and the new model is saved, it will appear in the Model list.

**IMPORT MODEL**-
- Tap Import from SD to import from SD card
- Tap Receive via Bluetooth to import over Bluetooth.

**SORT MODEL LIST**-
- Tap on the down arrow to move a model down the list
- Tap on the up arrow to move up on the list
From inside the MODELS screen, Tap on EDIT button within the model image to access MODEL PROPERTIES.

**USE THE MODEL PROPERTIES TO:**
- Change Model Name
- Change Theme Color
- Change Model Image
- Export Models
- Duplicate Models
- Delete Models

**MODEL NAME**-
- Tap in the model name box
- Enter up to 20 characters

**THEME COLOR**-
Tap the COLOR box to select a different theme color

**MODEL IMAGE**-
- Tap the PHOTO box to change the image
- Use the PHOTO PICKER to select an image from an SD card

**EXPORT MODEL**-
- Tap EXPORT to SD to export current model to SD card
- Tap TRANSFER VIA BLUETOOTH to export a model directly to another transmitter.

**DUPLICATE/DELETE MODEL**-
- Tap DUPLICATE THIS MODEL to make a copy of the current model.
- Tap DELETE MODEL to delete current model.

**RESET MODEL**-
Tap RESET MODEL to return to defaults.
The Setup Screen allows for quick and easy editing of all model settings. The Setup Screen is divided into 2 sections.

**Channels-**
- Steering
- Throttle & Brake/Reverse
- Aux

**Settings-**
- Alerts
- Binding
- Mapping
- Timers
- Telemetry
- Mixes
- Drive Modes
- AWS Mode
- Travel
- Subtrim
- Reverse

The bottom of the screen also has quick links to MODEL SETUP and APP SETTINGS as well as displaying the version number of the App.

**STEERING**

The STEERING screen allows for programming of all steering functions.

**AVAILABLE FUNCTIONS:**
- Steering Curve
- Steering Trim
- Steering Speed
- Steering Rate
- Channel Properties
- AWS Mode
- Travel
- Subtrim
- Reverse

**STEERING CURVE**

Steering response is adjustable using an EXPO or Custom steering curves.

**Standard-** Linear steering output (default)

**Exponential-** Positive (+) EXPO values decrease steering sensitivity around neutral.
On-the-Fly Button-
Select a switch for instant adjustment of the expo curve while driving.

Custom-
Up to 7 selected points can be adjusted to custom tailor steering response throughout the range.

- Tap on the line to add points.
- Tap on a point to adjust its position using the sliders below.
- Delete a point by tapping on it, then select Delete point (red box above graph)

STEERING TRIM-
Steering trim adjusts the steering neutral position. Steering Trim is defaulted to Switch B but can be assigned to any trimmer/switch.

- Common-
- Drive Mode-

STEERING SPEED-
Reduces servo output transit time (slows down the servo). Used on steering to prevent overly sensitive steering response.

Tip

Look for the ON-THE-FLY BUTTON in most menus. Allows for on the fly adjustments of menu items.
STEERING RATE-
Steering rate allows for on-the-fly adjustments of steering travel.
Steering Rate is defaulted to Switch F but can be assigned to any trimmer/switch.

CHANNEL PROPERTIES-
Displays current position of the steering wheel.

AWS MODE-
AWS Mode supports 4 types of all wheel steering
• Front Wheel Steering
• Rear Wheel Steering
• 4 Wheel Steering
• 4 Wheel Crab Steering.
Drive Modes must be select when AWS is active.

STEERING TRAVEL-
Allows independent adjustments of the right and left steering end points.
Adjustment range is 0 to 150%.

STEERING SUBTRIM-
Used to correct minor servo arms/ linkages inaccuracy’s.

IMPORTANT: Use minimal Subtrim values. Subtrim offsets the entire stroke including the center and endpoint positions.

REVERSE-
Reverses servo output direction.
The Throttle & Reverse screen allows for programming of all throttle and brake functions.

**AVAILABLE FUNCTIONS:**
- Throttle Curve
- Throttle Trim
- Throttle Rate
- Reverse Rate
- Traction Control
- ABS
- Servo Speed
- Channel Properties
- Travel
- Subtrim
- Reverse

**THROTTLE CURVE**-
Throttle response is adjustable using an EXPO or Custom throttle curves.

**Standard**- Linear throttle output (default)

**Exponential**- Positive (+) EXPO values decrease throttle sensitivity around neutral.

**On-the-Fly Button**- Select a switch for instant adjustment of the expo curve while driving.

**Custom**- Up to 7 selected points can be adjusted to custom tailor throttle response throughout the range.
- Tap on the line to add points.
- Tap on a point to adjust its position using the sliders below.
- Delete a point by tapping on it, then select Delete point (red box above graph)
BRAKE CURVE-
Brake response is adjustable using an EXPO or Custom Brake curves.

**Standard**- Linear output (default)

**Exponential**- Positive (+) EXPO values decrease brake sensitivity around neutral.

**On-the-Fly Button**- Select a switch for instant adjustment of the expo curve while driving.

**Custom**- Up to 7 selected points can be adjusted to custom tailor brake response throughout the range.
- Tap on the line to add points.
- Tap on a point to adjust its position using the sliders below.
- Delete a point by tapping on it, then select Delete point (red box above graph)

THROTTLE TRIM-
Throttle trim adjusts the steering neutral position and is used to adjust static brakes.
Throttle Trim is defaulted to Switch A but can be assigned to any trimmer/switch.
- Common-
- Drive Mode-

THROTTLE RATE-
Throttle rate is a full throttle limiter that limits the full throttle position.
Throttle Rate can be assigned to any trimmer/witch.
REVERSE RATE-
Reverse rate adjusts the percentage of throttle available for reverse. Reverse rate can be assigned to any trimmer/switch.

BRAKE RATE-
Brake rate adjusts the full brake position. Brake rate can be assigned to any trimmer/switch.

TRACTION CONTROL-
Traction Control adjusts the acceleration (ramp) rate providing improved throttle control especially on slippery tracks.
- **Ramp Rate** - adjusts the rate of acceleration (1 = slow, 100 = fast)
- **Cutoff Point** - Allows the selection of a throttle position where the ramp rate is disengaged anytime the throttle output is above that point. Traction control can be assigned to any trimmer/switch.

ABS (AUTOMATIC BRAKING SYSTEM)-
ABS helps prevent brake lock-ups and improves braking performance by pulsing the brakes.
- **Engagement Point**: The throttle position that the pulse braking takes place (0 to 100, default is 60).
- **Pulse Width**: The distance the throttle travels during the pulse braking (0 to 100, default is 50).
- **Pulse Per Second**: The pulsing speed or frequency of the pulse braking (-1 to -30, default is -1).
- **Delay**: The time delay before the pulsing takes place.

IDLE UP-
Used with gas engines, Idle Up advances the throttle’s idle position allowing for easier cold engine starting.
Idle Up can be assigned to any trimmer/switch and an alarm can be programmed warning when Idle up is active. See Alerts Section.
AWD MODE- (MOA)-
Motor-On-Axle (MOA) programming allows on the fly power distribution from the front to rear wheels. Adjustable ranges from 100% rear 0% front to 0% rear 100% front. When activated the default setting is 50%/50% and this setting can be adjusted and stored using drive modes or assigned to a trimmer/ Switch.

SERVO SPEED-
Reduces servo output transit time (slows down the servo). Servo Speed can be assigned to any trimmer/switch

CHANNEL PROPERTIES-
Displays current position of the steering wheel.

TRAVEL-
Allows independent precise adjustments of the brake end points.

THROTTLE SUBTRIM-
Used to correct minor servo arms/ linkages inaccuracy’s.

IMPORTANT: Use minimal Subtrim values. Subtrim offsets the entire stroke including the center and endpoint positions.

REVERSE-
Reverses servo output direction.
AUXILIARY (AUX) CHANNEL SETUP

The AUX setup screen allows for programming of all auxiliary channel functions.

AVAILABLE FUNCTIONS:
• Input Control
• AUX Curve
• AUX Speed
• Channel Properties
• Travel
• Subtrim
• Reverse

INPUT CONTROL-
• Select button or switch for control
• Select how many positions
• Select how many steps for each button press

AUX CURVE-
AUX channel response is adjustable using an EXPO or Custom curves.

Standard- Linear output (default)

Exponential- Positive (+) EXPO values decrease sensitivity around neutral.

Custom- Up to 7 selected points can be adjusted to custom tailor AUX channel response throughout the range.
• Tap on the line to add points.
• Tap on a point to adjust its position using the sliders below.
• Delete a point by tapping on it, then select Delete point (red box above graph)
AUXILIARY (AUX) CHANNEL SETUP

SERVO SPEED-
Reduces servo output transit time (slows down the servo).
Servo Speed can be assigned to any trimmer/switch

CHANNEL PROPERTIES-
Displays current position of the AUX channel.

TRAVEL-
Allows independent precise adjustments of the end points.

THROTTLE SUBTRIM-
Used to correct minor servo arms/ linkages inaccuracy’s.

IMPORTANT: Use minimal Subtrim values. Subtrim offsets the entire stroke including the center and endpoint positions.

REVERSE-
Reverses servo output direction.
The Alerts screen allows for assigning of Tone, Vibrate, Tone + Vibrate or Voice to system and Telemetry Alerts.

**AVAILABLE ALERTS:**

<table>
<thead>
<tr>
<th>System</th>
<th>Telemetry</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

AVC® technology is available, only when an AVC capable receiver is selected.

**Enable/Disable-**
Turn AVC on or off.

**Steering Gain-**
The default value is 50%. As the value increases, the AVC steering stability increases.

• If the front wheels begin to shake, the ST Gain value is too high. Reduce the ST Gain value until the front wheels stop shaking.

**Throttle Gain-**
The default value is 50%. As the value increases, the throttle management increases.
Priority-
The default value is 0%, meaning AVC technology is active throughout the steering range. As you turn the steering wheel away from center (neutral), the transmitter controls have priority over the AVC system. Increasing the Priority value decreases how active AVC is as the steering wheel is turned left and right. For example, if you increase Priority to 80%, you reduce the AVC steering control by 80% at full left or full right steering. Increasing the Steering Priority enables you to make tighter turns.

**BINDING**

Binding is the Process of teaching the receiver the specific transmitter’s code called GUID (Globally Unique Identifier) and storing failsafe values. When a receiver is bound to a transmitter/model memory, the receiver will only respond to that specific transmitter/model memory.

1. Tap the Desired Frame Rate drop down to select from 5.5ms, 11ms and 22ms.
   - If 5.5ms frame rate is selected in the transmitter, only two channels, Steering and Throttle, are operational. The Aux channels can be used to power a personal transponder or lights.
   - If a frame rate other than 5.5ms is selected, the Aux channels will operate as extra servo channels.
2. With the receiver in bind mode Tap the Begin Binding button.

**IMPORTANT:** Re-bind any time you change the frame rate in the transmitter.
The current drive mode is always displayed in the top left corner of the 4 main screens. Every model can have several drive modes programmed to a switch or button for on-the-fly adjustments. Once a drive mode is selected, Changes to model setup, trim and timers will only effect that drive mode.

- Tap the ON-the-Fly Button drop down to select a button or switch to enable instant mode changes.
- Tap on the Drive Mode button to change the drive mode name
- Tap on Flag Color to change the color of the Drive mode banner.
- Tap on Delete to delete drive modes (there must be at least 1 drive mode).
- If more than 1 drive mode, tap on the arrow buttons to order the list.

The Mapping screen displays an overview of all transmitter and receiver functions as they are currently setup for the active model. Use the mapping screen to help correctly connect servo and auxiliary equipment into the correct receiver port.
The Telemetry SetUp Screen allows for editing values as well as how the information is displayed on the Telemetry Screen.

**AVAILABLE FUNCTIONS:**
- Temperature
- Receiver Battery
- Speed/RPM
- Sensor Type
- Roll-Out

- Tap DISPLAY to Hide the telemetry information on the Telemetry screen. If information is already hidden, tap Hide to show.
- Change Minimum values displayed (per sensor)
- Change Maximum values displayed (per sensor)
- Change Warning Threshold (per sensor)
- Choose motor sensor type and Pole Count to accurately display motor RPM’s
- Select drive ratios and tire diameter to accurately display model speeds.

**AVAILABLE TIMERS:**
- Total Time
- Model Time
- Up Timer
- Down Timer
- Rolling Lap Timer

The DX6R offers 5 timers, all viewable from the Dashboard. Pause and Reset the timers directly on the dashboard or configure a Timer switch or button.

To configure the timers and to clear Model Time and Total Drive Time go to the Timers screen in SetUp.
TIMERS

Timers 1-3 can be configured to be either an Up, Down or Lap Timer.

**Up Timer**-
The Up Timer counts up, functioning as a stopwatch when triggered via a selectable button/switch. It is useful for timing a fuel run to determine fuel mileage/pit stop strategy or, for electrics, to time the run time of a pack to determine gear ratio and setup information.

- Select minutes (0-599) and seconds (0-59) by tapping in the appropriate box.
- Select the button or switch to activate, pause and reset the timer.
- This timer can also be paused or reset on the main DashBoard screen.

**Down Timer**-
The down Timer counts down, when triggered via a selectable button/switch. When the down timer expires, an Alert will sound and the timer begins to count up.

- Select minutes (0-599) and seconds (0-59) by tapping in the appropriate box.
- Select the button or switch to activate, pause and reset the timer.
- This timer can also be paused or reset on the main DashBoard screen.

**IMPORTANT:** Configure the Timers Alert type (Tone, Vibrate, Tone + Vibrate or Voice), by going to the ALERTS screen in SETUP.

**Rolling Lap Timer**-
Start the Rolling Lap Timer via a selectable programmable switch. When the timer expires, an alarm sounds and the Lap timer resets and begins to count down again.

- Select minutes (0-599) and seconds (0-59) by tapping in the appropriate box.
- Select the button or switch to activate, pause and reset the timer.
- This timer can also be paused or reset on the main DashBoard screen.
SYSTEM SETTINGS

AVAILABLE FUNCTIONS:

• User Name
• Units
• Scroll Wheel
• Version Number
• Serial Number
• Create Backup
• Restore from Backup
• Recalibrate the DX6R

User Name-
Tap on the name input box to enter User Name up to 20 characters long.

Units-
Select between Imperial/US or Metric.

Scroll Wheel-
Configure the Scroll Wheels button push to jump to one of these four screens.
• DashBoard
• Telemetry
• Monitor
• SetUp

Version & Serial Number-

Create Backup-
Tap on the CREATE BACKUP button to save a backup copy of the DX6R.

Restore from Backup-
Tap on the RESTORE FROM BACKUP button to restore the DX6R from a saved version.

Recalibrate DX6R-
Tap on the RECALIBRATE DX6R button to enter into recalibration mode. Follow the on screen directions and save when finished.
The DX6R is designed to be extremely adjustable to suite a wide variety of driver needs. All control inputs can be configured for Left or Right handed driving and can be adjusted for angle and spring tension.

**AVAILABLE ADJUSTMENTS:**
- Adjustable trigger and steering tension
- Multiple trigger position
- Multiple wheel drop-down options
- 10° and 15° Steering Adapters
- Small and Large Steering Wheel
- Left- or right-hand steering
- 3 grip sizes

**THROTTLE DISTANCE/ANGLE**
- 2.5mm hex wrench
- Loosen 1 to 2 turns.
- Adjust IN or OUT.
- Tighten

**THROTTLE TENSION**
- 1.5mm hex wrench
- Clockwise to decrease tension

**STEERING TENSION**
- 1.5mm hex wrench
- Clockwise to increase tension
PHYSICAL TRANSMITTER ADJUSTMENTS

DROPDOWN STEERING WHEEL OPTIONS

The DX6R comes with the dropdown wheel installed. The dropdown can be rotated for a perfect feel or removed for a standard wheel layout. All the parts necessary to convert to the standard wheel are included.

ROTATE:

- Turn off the DX6R
- Using a 2mm hex wrench, remove 3 screws.
- Rotate the drop down to the desired angle.
- Align with the screw holes and re-install the 3 screws being careful not to pinch any wires.

STANDARD WHEEL CONVERSION:

- Using a 2mm hex wrench, remove the 3 screws from the drop down and remove the drop down from the transmitter. Carefully disconnect the 2 wiring harness from inside the transmitter.
- Using a 1.5mm hex wrench, remove the steering wheel.
- Using a 2mm hex wrench, remove 2 screws from the steering mechanism. Remove the steering mechanism from the drop down being careful to pull the wiring harness through the opening.
- Keep the drop down in a safe place for future use.
- Connect the 2 wiring harnesses to the board inside the DX6R. Note that one connector has 6 pins and the other has 7.
- Re-install the steering mechanism directly onto the transmitter using the 2 screws
- Re-install the steering wheel.

There are two wheel CAM’s included with the DX6R. They attach to the steering mechanism and physically limit the wheel travel. Use the 32º CAM with the large wheel and the 36º CAM with the Small steering wheel.
PHYSICAL TRANSMITTER ADJUSTMENTS

STEERING WHEEL WEDGES
The DX6R comes with a 10° and 15° wedge to angle the steering wheel. The wedges can be used with the dropdown or standard configuration.

- Refer to the DROPDOWN STEERING WHEEL OPTIONS section for directions on removing and installing the steering mechanism.
- Choose the 10° or 15° wedge.
- The wedge goes between the steering mechanism and the drop down (or transmitter if the drop down is not being used) and can be rotated to almost any angle.

CHANGING GRIPS
The DX6R comes with 3 sizes of grips. The medium-size grip is installed at the factory.

- Lift the edge of the grip and pull the grip away from the handle.
- Align the tabs on the new grip with the slots in the handle.
- Press the grip against the handle.
CHANGING FROM RIGHT HANDED TO LEFT HANDED
The DX6R can be configured for either right or left handed drivers.

STEERING MECHANISM:
- Turn off the DX6R
- Using a 2mm hex wrench, remove 3 screws.
- Carefully remove the 2 wire connectors from the board inside the transmitter.
- Set aside

BACK COVER:
- Using a 2mm hex wrench, remove 2 screws.
- Remove the back cover and re-install on the opposite side of the transmitter.

STEERING MECHANISM:
- Connect the 2 wire connectors to the board inside the DX6R. Note that one connector has 6 pins and the other has 7.
- Align with screw holes and re-install the 3 screws being careful not to pinch any wires.
PHYSICAL TRANSMITTER ADJUSTMENTS

CHANGING FROM RIGHT HANDED TO LEFT HANDED -continued-
The knob/switch I assembly can also be switched with the headphone jack assembly on the back of the transmitter.

REMOVING THE ASSEMBLIES
• Turn off the DX6R
• Using a small .050 screwdriver, remove 1 screw from each assembly
• Lift up on each assembly.
• Carefully remove the wiring harness from the board inside the transmitter.

INSTALLING THE ASSEMBLIES
• Install the assemblies on the opposite face of the transmitter.
• Connect the wiring harness to the board inside the DX6R.

IMPORTANT: There is a 4 pin and 5 pin attachment on each side of the transmitter. The headphone jack connector will use the 4 pin connector and the Knob/Switch I will use the 5 pin connector.

• Carefully seat the assemblies into face of the transmitter being careful not to pinch any wires.
• Install the one Phillips head screw into each assembly.
 INCLUDED SR2000/SR6000T RECEIVERS

SR2000 Micro Race receiver
The Spektrum™ SR2000 DSMR® Micro Race receiver is compatible with all Spektrum DSMR transmitters and is also backwards compatible with DSM2® transmitters. The SR2000 receiver is NOT compatible with DSM® transmitters.

Specifications
Type: DSMR
Dimensions (LxWxH): 25.5 x 17.6 x 13.6mm
Channels: 2
Weight: 5.5 g
Band: 2.4GHz
Voltage Range: 3.5–9.6V

SR6000T Telemetry Receiver
The Spektrum SR6000T Telemetry Receiver is compatible with all Spektrum DSMR surface transmitters. Telemetry functions require a Spektrum transmitter capable of telemetry.

Specifications
Type: DSMR with internal telemetry
Dimensions (LxWxH): 37.5 x 27.7 x 15.7mm
Antenna Length: 210mm
Channels: 6
Weight: 9.2 g
Band: 2.4GHz
Voltage Range: 3.5–9.6V

For full receiver manuals go to https://www.spektrumrc.com/
What this Warranty Covers - Horizon Hobby, LLC, (Horizon) warrants to the original purchaser that the product purchased (the “Product”) will be free from defects in materials and workmanship for a period of 1 year from the date of purchase.

What is Not Covered
This warranty is not transferable and does not cover (i) cosmetic damage, (ii) damage due to acts of God, accident, misuse, abuse, negligence, commercial use, or due to improper use, installation, operation or maintenance, (iii) modification of or to any part of the Product, (iv) attempted service by anyone other than a Horizon Hobby authorized service center, (v) Product not purchased from an authorized Horizon dealer, (vi) Product not compliant with applicable technical regulations, or (vii) use that violates any applicable laws, rules, or regulations.

OTHER THAN THE EXPRESS WARRANTY ABOVE, HORIZON MAKES NO OTHER WARRANTY OR REPRESENTATION, AND HEREBY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE PURCHASER ACKNOWLEDGES THAT THEY ALONE HAVE DETERMINED THAT THE PRODUCT WILL SUITABLY MEET THE REQUIREMENTS OF THE PURCHASER’S INTENDED USE.

Purchaser’s Remedy
Horizon’s sole obligation and purchaser’s sole and exclusive remedy shall be that Horizon will, at its option, either (i) service, or (ii) replace, any Product determined by Horizon to be defective. Horizon reserves the right to inspect any and all Product(s) involved in a warranty claim. Service or replacement decisions are at the sole discretion of Horizon. Proof of purchase is required for all warranty claims.

SERVICE OR REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS THE PURCHASER’S SOLE AND EXCLUSIVE REMEDY.

Limitation of Liability
HORIZON SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY, REGARDLESS OF WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY OR ANY OTHER THEORY OF LIABILITY, EVEN IF HORIZON HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Further, in no event shall the liability of Horizon exceed the individual price of the Product on which liability is asserted. As Horizon has no control over use, setup, final assembly, modification or misuse, no liability shall be assumed nor accepted for any resulting damage or injury. By the act of use, setup or assembly, the user accepts all resulting liability. If you as the purchaser or user are not prepared to accept the liability associated with the use of the Product, purchaser is advised to return the Product immediately in new and unused condition to the place of purchase.

Law
These terms are governed by Illinois law (without regard to conflict of law principals). This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Horizon reserves the right to change or modify this warranty at any time without notice.

WARRANTY SERVICES
Questions, Assistance, and Services
Your local hobby store and/or place of purchase cannot provide warranty support or service. Once assembly, setup or use of the Product has been started, you must contact your local distributor or Horizon directly. This will enable Horizon to better answer your questions and service you in the event that you may need any assistance. For questions or assistance, please visit our website at www.horizonhobby.com, submit a Product Support Inquiry, or call the toll free telephone number referenced in the Warranty and Service Contact Information section to speak with a Product Support representative.

Inspection or Services
If this Product needs to be inspected or serviced and is compliant in the country you live and use the Product in, please use the Horizon Online Service Request submission process found on our website or call Horizon to obtain a Return Merchandise Authorization (RMA) number. Pack the Product securely using a shipping carton. Please note that original boxes may be included, but are not designed to withstand the rigors of shipping without additional protection. Ship via a carrier that provides tracking and insurance for lost or damaged parcels, as Horizon is not responsible for merchandise until it arrives and is accepted at our facility. An Online Service Request is available at http://www.horizonhobby.com/content/service-center_render-service-center. If you do not have internet access, please contact Horizon Product Support to obtain a RMA number along with instructions for submitting your product for service. When calling Horizon, you will be asked to provide your complete name, street address, email address and phone number where you can be reached during business hours.
When sending product into Horizon, please include your RMA number, a list of the included items, and a brief summary of the problem. A copy of your original sales receipt must be included for warranty consideration. Be sure your name, address, and RMA number are clearly written on the outside of the shipping carton.

**NOTICE: Do not ship LiPo batteries to Horizon. If you have any issue with a LiPo battery, please contact the appropriate Horizon Product Support office.**

**Warranty Requirements**

For Warranty consideration, you must include your original sales receipt verifying the proof-of-purchase date. Provided warranty conditions have been met, your Product will be serviced or replaced free of charge. Service or replacement decisions are at the sole discretion of Horizon.

**Non-Warranty Service**

Should your service not be covered by warranty, service will be completed and payment will be required without notification or estimate of the expense unless the expense exceeds 50% of the retail purchase cost. By submitting the item for service you are agreeing to payment of the service without notification. Service estimates are available upon request. You must include this request with your item submitted for service. Non-warranty service estimates will be billed a minimum of ½ hour of labor. In addition you will be billed for return freight. Horizon accepts money orders and cashier’s checks, as well as Visa, MasterCard, American Express, and Discover cards. By submitting any item to Horizon for service, you are agreeing to Horizon’s Terms and Conditions found on our website http://www.horizonhobby.com/content/service-center.

**ATTENTION: Horizon service is limited to Product compliant in the country of use and ownership. If received, a non-compliant Product will not be serviced. Further, the sender will be responsible for arranging return shipment of the un-serviced Product, through a carrier of the sender’s choice and at the sender’s expense. Horizon will hold non-compliant Product for a period of 60 days from notification, after which it will be discarded.**

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

⚠️ **CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This product contains a radio transmitter with wireless technology which has been tested and found to be compliant with the applicable regulations governing a radio transmitter in the 2.400GHz to 2.4835GHz frequency range.

This equipment has been tested and found to comply with the limits for Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**NOTICE:** Modifications to this product will void the user’s authority to operate this equipment.
Antenna Separation Distance
When operating your Spektrum transmitter, please be sure to maintain a separation distance of at least 5 cm between your body (excluding fingers, hands, wrists, ankles and feet) and the antenna to meet RF exposure safety requirements as determined by FCC regulations.

The illustrations show the approximate 20 cm RF exposure area and typical hand placement when operating your Spektrum transmitter.

IC INFORMATION

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

COMPLIANCE INFORMATION FOR THE EUROPEAN UNION

Horizon Hobby, LLC hereby declares that this product is in compliance with the essential requirements and other relevant provisions of the RED Directive. A copy of the EU Declaration of Conformity is available online at: http://www.horizonhobby.com/content/support-render-compliance.

Instructions for Disposal of WEEE by Users in the European Union

This product must not be disposed of with other waste. Instead, it is the user's responsibility to dispose of their waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or where you purchased the product.
